Each of these factors is explained below. Management has analyzed changes in these factors at the levels of the Company and its material consolidated subsidiaries.
(1)"Currency effects" consist of translation adjustments, which come from the translation of the currency of foreign subsidiaries' financial statements into Japanese Yen, and foreign currency adjustments, which result from foreign-currency-denominated sales, which, at the levels of the Company and those consolidated subsidiaries which have been analyzed, primarily relate to the following currencies: U.S. dollar, Canada dollar, Euro, GBP, BRL and Japanese Yen
(2) With respect to "Cost reduction, etc.", management has analyzed cost reduction and effects of raw material cost fluctuations at the levels of the Company and its material foreign manufacturing subsidiaries in North America, Europe, Asia and other regions.
(3) With respect to "Revenue, model mix, etc.", management has analyzed changes in sales volume and in the mix of product models sold in major markets which have resulted in increases/decreases in profit, as well as certain other reasons for increases/decreases in sales revenue and cost of sales.
(4) With respect to "Selling, General and Administrative expenses", management has analyzed reasons for an increase/decrease in selling, general and administrative expenses from the previous fiscal year net of currency translation effects.
(5) With respect to "Research and Development expenses", management has analyzed reasons for an increase/decrease in research and development expenses from the previous fiscal year net of currency translation effects.
