### Honda Issues an Integrated Report – “Honda Report 2022”

TOKYO, Japan, September 30, 2022 - Honda Motor Co., Ltd. today issued the company’s integrated report, the “Honda Report 2022,” and made it available on the company website.

The Honda Report 2022 summarizes Honda’s medium- to long-term initiatives to enhance its corporate value from both financial and non-financial perspectives. While the Honda Sustainability Report 2022, which was published in June this year, puts primary focus on reporting progress Honda made in its sustainability initiatives, the Honda Report 2022 focuses on sharing stories about how Honda will enhance its corporate value into the future. In addition to messages from Honda’s global CEO and CFO, this integrated report includes introduction of Honda’s value creation process and company-wide / business-by-business value creation strategies, as well as specific initiatives in areas that serve as the foundation for value creation, such as intellectual property and human resources.

Honda is striving to evolve as a company to continue creating new value while upholding its desire to “help people and society” and “expand people’s life’s potential,” a purpose that remains unchanged since the company’s founding. By issuing the integrated report, Honda intends to facilitate an understanding among stakeholders of Honda’s vision and value creation initiatives. Moreover, Honda will pursue sustainable enhancement of its corporate value while continuing its efforts to have enhanced interaction with and disclosure to its stakeholders.
