2024 marks the 60th year since Honda first raced in F1.

Since Honda's first F1 car, the RA271 raced at the German Grand Prix held at the Nürburgring on August 2, 1964, Honda has continued to refine its people and technologies in the field of motorsports, with F1 at the forefront.

To commemorate the 60th year since its first participation in F1, Honda has created a logo featuring the RA271. Honda is also planning to develop merchandise featuring this logo and to hold an event in which the RA272, the racing machine that brought Honda its first F1 victory in its second year of participation, will be driven.

More details will be announced on Honda's official social media account.
