

Sustainability Management Structure

Structure for Deliberating Sustainability Initiatives

Around the world, the growth potential of companies is evaluated increasingly not by short-term performance but from a medium- to long-term perspective.

Honda has been striving to strengthen initiatives to resolve various issues that impact corporate value over the medium and long term, taking into account the views of stakeholders. In other words, we believe that improving sustainability as a company is one of the vital elements of corporate strategy.

For this reason, we initiated the Sustainability Strategy Committee, chaired by the company Vice President and COO, as a platform to discuss and assess policy and initiatives related to sustainability activities.

Through this Committee, we compare the challenges in realizing the long-term vision of the company against the expectations and demands of key stakeholders identified through dialogue, and deliberate on material issues at the management level, including verifying progress of response and implementation.

From FY2018, it has been decided that sustainability issues will be discussed in one committee in a more integrated manner, including environmental and safety-related domains that were discussed in a different committee until the previous fiscal year.

Honda determines corporate strategy through the Executive Council and Board of Directors, taking into consideration the key challenges examined here, which are implemented as strategies and measures for business and functional operations and subsidiaries.

Sustainability Management Structure from FY2018
