Honda’s Sustainability

The Honda Philosophy forms the values shared by all Honda Group companies and all of their associates and is the basis for Honda’s corporate activities and the associates’ behavior and decision-making.

In order to achieve both the creation of growth opportunities for the Company and a sustainable society, Honda has set striving to be “a company that society wants to exist” as its direction for the 21st century. It is also advancing initiatives known as “Creating the Joys,” “Expanding the Joys” and “Ensuring the Joys for the Next Generation.”

The “2030 Vision” is one milestone indicating in concrete terms the direction Honda ought to take toward realizing these objectives. For Honda’s sustainability, it is important to meet stakeholders’ expectations and needs by providing value through its products and services. Equally important is to fulfill its corporate social responsibility such as by considering the impact on the environment and society and to contribute to the resolution of social issues through its business activities. To this end, Honda is devising medium- and long-term strategies that consider the roles it should fulfill and contributions it should make. Further, these are matched to the characteristics of each region around the world, using the materiality matrix, which assesses issues based on both stakeholder and Honda’s corporate perspectives, as its guide.
