## **[C] Other**

### **1. Loss related to airbag inflators**

Honda has been conducting market-based measures in relation to airbag inflators. Honda recognizes a provision for specific warranty costs when it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. There is a possibility that Honda will need to recognize additional provisions when new evidence related to the product recalls arise, however, it is not possible for Honda to reasonably estimate the amount and timing of potential future losses as of the date of this report. In the United States and Canada, various class action lawsuits and civil lawsuits related to the above mentioned market-based measures have been filed against Honda. The plaintiffs have claimed for properly functioning airbag inflators, compensation of economic losses including incurred costs and the decline in the value of vehicles, as well as punitive damages. Most of the class action lawsuits in the United States were transferred to the United States District Court for the Southern District of Florida and consolidated into a multidistrict class action litigation.

For the six months ended September 30, 2017, Honda has reached a settlement with the plaintiffs regarding the multidistrict class action litigation in the United States. This settlement is subject to the final court approval. Honda recognized the settlement of JPY 53,739 million as selling, general and administrative expenses, which includes funds to support airbag inflator recall efforts and such.

Except for the class action lawsuits in the United States which have been settled, other class action lawsuits and civil lawsuits have not been resolved yet. Honda did not recognize a provision for loss contingencies because the conditions for a provision have not been met as of the date of this report. Therefore, it is not possible for Honda to reasonably estimate the amount and timing of potential future losses as of the date of this report because there are some uncertainties, such as the period when these lawsuits will be concluded.

## **2. Impairment loss and reversal of impairment loss on investments accounted for using the equity method**

For the six months ended September 30, 2016, the Company recognized impairment losses of JPY 12,871 million on certain investments accounted for using the equity method because there is objective evidence of impairment from declines in quoted market values. The impairment losses are included in share of profit of investments accounted for using the equity method in the condensed consolidated statement of income. For the six months ended September 30, 2017, the Company did not recognize any significant impairment losses.

In addition, for the six months ended September 30, 2017, the Company recognized reversal of impairment losses of JPY 15,782 million, which had been previously recognized, on certain investments accounted for using the equity method mainly due to the recovery of quoted market values. The reversal of impairment losses is included in share of profit of investments accounted for using the equity method in the condensed consolidated statement of income.

## **3. Impact of the pension plan amendment on the Company's consolidated financial position and results of operations in previous fiscal year**

In August 2016, the Company and its certain subsidiaries in Japan decided, effective April 1, 2017, to extend mandatory retirement age from 60 years old to 65 years old and introduce a flexible retirement scheme that enables employees to choose retirement age between 60 years old and 65 years old, along with amendments to their defined benefit pension plans to align with the postponement of the retirement age, to fulfill diversifying needs of individual employees. The plan amendments include the revision of the benefit curve, to make a lump-sum benefit payment at the retirement age between 60 years old and 65 years old under the new plan consistent with that at the mandatory retirement age, 60 years old. In addition, one of the defined benefit pension plans is replaced by a defined contribution plan.

These plan amendments resulted in a reduction of the defined benefit obligations and recognition of the past service cost in profit or loss. Honda recognized JPY 84,024 million of past service cost in a credit to profit or loss, of which JPY 37,197 million is included in cost of sales, JPY 21,385 million is included in selling, general and administrative and JPY 25,442 million is included in research and development in the condensed consolidated statements of income for the six months ended September 30, 2016. The defined benefit obligations and plan assets were also remeasured.
