Consolidated Financial Results

Overview of Operating Performance

Honda's consolidated sales revenue for the six months ended September 30, 2022 increased by 15.7%, to ¥8,085.3 billion from the same period last year, due mainly to increased sales revenue in Motorcycle business as well as positive foreign currency translation effects. Operating profit increased by 2.5%, to ¥453.4 billion from the same period last year, due mainly to an increase in profit attributable to price and cost impacts as well as positive foreign currency effects, which was partially offset by decreased profit attributable to sales impacts. Profit before income taxes decreased by 8.0%, to ¥515.8 billion from the same period last year, due mainly to decreased share of profit of investments accounted for using the equity method. Profit for the period attributable to owners of the parent decreased by 13.0%, to ¥338.5 billion from the same period last year.

^{*} Honda Group Unit Sales is the total unit sales of completed products of Honda, its consolidated subsidiaries and its affiliates and joint ventures accounted for using the equity method. Consolidated Unit Sales is the total unit sales of completed products corresponding to consolidated sales revenue to external customers, which consists of unit sales of completed products of Honda and its consolidated subsidiaries. Certain sales of automobiles that are financed with residual value type auto loans and others by our Japanese finance subsidiaries and provided through our consolidated subsidiaries are accounted for as operating leases in conformity with IFRS and are not included in consolidated sales revenue to the external customers in our Automobile business. Accordingly, they are not included in Consolidated Unit Sales, but are included in Honda Group Unit Sales of our Automobile business.

Sales revenue from external customers increased by 13.5%, to ¥4,920.1 billion from the same period last year, due mainly to positive foreign currency translation effects, which was partially offset by decreased consolidated unit sales. Operating profit decreased by 45.7%, to ¥63.5 billion from the same period last year, due mainly to decreased profit attributable to sales impacts, which was partially offset by positive foreign currency effects.

Financial Services Business

Sales revenue from external customers increased by 5.9%, to ¥1,527.9 billion from the same period last year, due mainly to positive foreign currency translation effects, which was partially offset by decreased operating lease revenues. Operating profit decreased by 13.4%, to ¥153.0 billion from the same period last year, due mainly to a decrease in profit attributable to decreased sales revenue, which was partially offset by positive foreign currency effects.

Unite (thousands)

Sales revenue from external customers increased by 20.3%, to ¥224.5 billion from the same period last year, due mainly to positive foreign currency translation effects. Operating profit was ¥12.0 billion, an increase of ¥11.9 billion from the same period last year, due mainly to decreased operating costs in Other businesses as well as positive foreign currency effects. In addition, operating loss of aircraft and aircraft engines included in Power product and other businesses was ¥12.0 billion, an improvement of ¥3.5 billion from the same period last year, due mainly to decreased operating costs, which was partially offset by decreased profit attributable to negative foreign currency translation effects.

Honda Group Unit Sales is the total unit sales of completed power products of Honda, its consolidated subsidiaries and its affiliates and joint ventures accounted for using the equity method. Consolidated Unit Sales is the total unit sales of completed power products corresponding to consolidated sales revenue to external customers, which consists of unit sales of completed power products of Honda and its consolidated subsidiaries. In Power Product business, there is no discrepancy between Honda Group Unit Sales and Consolidated Unit Sales since no affiliate and joint venture accounted for using the equity method were involved in the sale of Honda power products.

Cash Flows

Consolidated cash and cash equivalents on September 30, 2022 increased by \(\frac{3}{2}\)260.4 billion from March 31, 2022, to \(\frac{3}{3}\), 935.3 billion. The reasons for the increases or decreases for each cash flow activity, when compared with the same period last year, are as follows:

Net cash provided by operating activities amounted to \(\xi\)1,341.3 billion of cash inflows. Cash inflows from operating activities increased by \(\xi\)1,043.2 billion from the same period last year, due mainly to increased cash received from customers, which was partially offset by increased payments for selling, general and administrative expenses.

Net cash used in investing activities amounted to ¥428.6 billion of cash outflows. Cash outflows from investing activities increased by ¥201.9 billion from the same period last year, due mainly to an increase in payments for additions to property, plant and equipment as well as for acquisitions of other financial assets.

Net cash used in financing activities amounted to ¥952.7 billion of cash outflows. Cash outflows from financing activities increased by ¥740.0 billion from the same period last year, due mainly to decreased proceeds from financing liabilities and increased dividends paid.

Research and Development

The changes in research and development activities by Honda and its subsidiaries for the six months ended September 30, 2022 are as follows:

The Company has established Business Development Operations that consolidate functions to develop businesses and areas of software and core electrification technologies in order to strengthen new value creation by combining hardware with software and services. Some technology areas have been moved from their respective product-based business operations, such as motorcycle, automobile and power products, and combined under Business Development Operations. With this change, Honda will accelerate the speed at which it can move and enhance the synergy effect by integrating technology and business for multiple product domains.

Notes to Condensed Consolidated Interim Financial Statements

(1) Reporting Entity

Honda Motor Co., Ltd. (the "Company") is a public company domiciled in Japan. The Company and its subsidiaries (collectively "Honda") develop, manufacture and distribute motorcycles, automobiles, power products and others throughout the world, and also provide financial services to customers and dealers for the sale of those products. Principal manufacturing facilities are located in Japan, the United States of America, Canada, Mexico, Italy, France, China, India, Indonesia, Malaysia, Philippines, Thailand, Vietnam, Argentina and Brazil.

(2) Basis of Preparation

(a) Compliance with Interim Financial Reporting Standards

The condensed consolidated interim financial statements of the Company have been prepared in accordance with IAS 34 "Interim Financial Reporting". The condensed consolidated interim financial statements should be read in conjunction with the Company's consolidated financial statements for the fiscal year ended March 31, 2022, since the condensed consolidated interim financial statements do not include all the information required in the annual consolidated financial statements, which have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board.

(b) Functional Currency and Presentation Currency

The condensed consolidated interim financial statements are presented in Japanese yen, which is the functional currency of the Company. All financial information presented in Japanese yen has been rounded to the nearest million Japanese yen, except when otherwise indicated.

(c) Use of Estimates and Judgments

The preparation of condensed consolidated interim financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies, the reported amount of assets, liabilities, revenues and expenses, and the disclosure of contingent assets and liabilities. Actual results could differ from these estimates. These estimates and underlying assumptions are reviewed on a continuous basis. Changes in these accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

The condensed consolidated interim financial statements are prepared based on the same judgments and estimations as those applied and described in the Company's consolidated financial statements for the fiscal year ended March 31, 2022.

(3) Summary of Significant Accounting Policies

The condensed consolidated interim financial statements are prepared based on the same accounting policies as those applied and described in the Company's consolidated financial statements for the fiscal year ended March 31, 2022.

Notes to Condensed Consolidated Interim Financial Statements

(4) Segment Information

Based on Honda's organizational structure and characteristics of products and services, Honda discloses segment information in four categories: Reportable segments of Motorcycle business, Automobile business and Financial services business, and other segments that are not reportable. The other segments are combined and disclosed in Power product and other businesses. Segment information is based on the components of Honda for which separate financial information is available that is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. The accounting policies used for segment information are consistent with the accounting policies used in the Company's condensed consolidated interim financial statements.

Principal products and services, and functions of each segment are as follows:

Explanatory notes:

- 1. Segment profit (loss) of each segment is measured in a consistent manner with consolidated operating profit, which is profit before income taxes before share of profit of investments accounted for using the equity method and finance income and finance costs. Expenses not directly associated with specific segments are allocated based on the most reasonable measures applicable.
- 2. Segment assets of each segment are defined as total assets including investments accounted for using the equity method, derivatives, and deferred tax assets. Segment assets are based on those directly associated with each segment and those not directly associated with specific segments are allocated based on the most reasonable measures applicable except for the corporate assets described below.
- 3. Intersegment sales revenues are generally made at values that approximate arm's-length prices.
- 4. Reconciling items include elimination of intersegment transactions and balances as well as unallocated corporate assets. Unallocated corporate assets, included in reconciling items as of September 30, 2021 and 2022 amounted to ¥954,524 million and ¥1,569,670 million, respectively, which consist primarily of the Company's cash and cash equivalents and financial assets measured at fair value through other comprehensive income.

Explanatory note:

* Honda recognizes provisions for product warranties to cover future product warranty expenses. Honda recognizes costs for general warranties on products Honda sells and for specific warranty programs, including product recalls. Honda recognizes general estimated warranty costs at the time products are sold to customers. Honda also recognizes specific estimated warranty program costs when it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. These provisions are estimated based on historical warranty claim experience with consideration given to the expected level of future warranty costs as well as current information on repair costs. Provisions for product warranties are utilized for expenditures based on the demand from customers and dealers.

Notes to Condensed Consolidated Interim Financial Statements

(9) Fair Value

(a) Definition of Fair Value Hierarchy

Honda uses a three-level hierarchy when measuring fair value. The following is a description of the three hierarchy levels:

- Level 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access as of the measurement date
- Level 2 Inputs other than quoted prices included within Level 1 that are observable for the assets or liabilities, either directly or indirectly
- Level 3 Unobservable inputs for the assets or liabilities

The level in the fair value hierarchy within which a fair value measurement in its entirety falls is based on the lowest input that is significant to the fair value measurement in its entirety. Honda recognizes the transfers between the levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

(b) Method of Fair Value Measurement

The fair values of assets and liabilities are determined based on relevant market information and through the use of an appropriate valuation method.

The measurement methods and assumptions used in the measurement of assets and liabilities are as follows:

(Cash and cash equivalents, trade receivables and trade payables)

The fair values approximate their carrying amounts due to their short-term maturities.

(Receivables from financial services)

The fair value of receivables from financial services is measured primarily by discounting future cash flows using the current interest rates applicable for these receivables of similar remaining maturities. Fair value measurement for receivables from financial services is classified as Level 3.

(Debt securities)

Debt securities consist mainly of mutual funds, corporate bonds, local bonds and auction rate securities.

The fair value of mutual funds with an active market is measured by using quoted market prices. Fair value measurement for mutual funds with an active market is classified as Level 1.

The fair values of corporate bonds and local bonds are measured based on proprietary pricing models provided by specialists and/or market makers and the models obtain a wide array of market observable inputs such as credit ratings and discount rates. Fair value measurements for corporate bonds and local bonds are classified as Level 2.

Notes to Condensed Consolidated Interim Financial Statements

The subsidiary's auction rate securities are A to AAA rated and are insured by qualified guarantee agencies, and reinsured by the Secretary of Education and the United States government, and guaranteed at approximately 95% by the United States government. To measure fair value of auction rate securities, Honda uses a third-party-developed valuation model which obtains a wide array of market observable inputs, as well as unobservable inputs including probability of passing or failing auction at each auction. Fair value measurement for auction rate securities is classified as Level 3.

(Equity securities)

The fair value of equity securities with an active market is measured by using quoted market prices. Fair value measurement for equity securities with an active market is classified as Level 1.

The fair value of equity securities with no active market is measured mainly by using a discounted cash flow method, a comparable company valuation method and other appropriate valuation methods. Fair value measurement for equity securities with no active market is classified as Level 3. In addition, in the case that cost represents the best estimate of fair value, fair value for the equity securities with no active market is measured at cost.

Cash flow forecasts and discount rate for the discounted cash flow model and price book-value ratio (PBR) of a comparable company for the comparable company valuation method are used as significant unobservable inputs in the fair value measurement of equity securities classified as Level 3. The fair value increases (decreases) as Cash flow forecasts increase (decrease), discount rate decline (rise) and PBR of a comparable company rise (decline). Such fair value measurements are conducted in accordance with the group accounting policy approved by the appropriate person of authority and based upon valuation methods determined by personnel in accounting divisions of Honda.

(Derivatives)

Derivatives consist mainly of foreign currency forward exchange contracts, foreign currency option contracts, currency swap agreements and interest rate swap agreements.

The fair values of foreign currency forward exchange contracts and foreign currency option contracts are measured by using market observable inputs such as spot exchange rates, discount rates and implied volatility. The fair values of currency swap agreements and interest rate swap agreements are measured by discounting future cash flows using market observable inputs such as interest rate benchmarks like U.S. dollar LIBOR, swap rates, and foreign exchange rates. Fair value measurements for these derivatives are classified as Level 2.

The credit risk of the counterparties is considered in the valuation of derivatives.

(Financing liabilities)

The fair value of financing liabilities is measured by discounting future cash flows using interest rates currently available for liabilities of similar terms and remaining maturities. Fair value measurement of financing liabilities is mainly classified as Level 2.

The table does not include financial assets and financial liabilities measured at amortized cost whose fair values approximate their carrying amounts.

(10) Contingent Liabilities

Claims and Lawsuits

Honda is subject to potential liability under various lawsuits and claims. Honda recognizes a provision for loss contingencies when it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. Honda reviews these pending lawsuits and claims periodically and adjusts the amounts recognized for these contingent liabilities, if necessary, by considering the nature of lawsuits and claims, the progress of the case and the opinions of legal counsel.

With respect to product liability, personal injury claims or lawsuits, Honda believes that any judgment that may be recovered by any plaintiff for general and special damages and court costs will be adequately covered by Honda's insurance and provision. Punitive damages are claimed in certain of these lawsuits.

After consultation with legal counsel, and taking into account all known factors pertaining to existing lawsuits and claims, Honda believes that the ultimate outcome of such lawsuits and pending claims should not result in liability to Honda that would be likely to have an adverse material effect on its consolidated financial position or results of operations.

Loss related to airbag inflators

Honda has been conducting market-based measures in relation to airbag inflators. Honda recognizes a provision for specific warranty costs when it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. There is a possibility that Honda will need to recognize additional provisions when new evidence related to the product recalls arise, however, it is not possible for Honda to reasonably estimate the amount and timing of potential future losses as of the date of this report.
