### Reason for Differences

Operating profit for the year ended March 31, 2026, was near the upper end of the forecast range, which was announced on March 12, 2026, despite EV-related losses, reflecting higher consolidated unit sales in the Automobile and Motorcycle businesses, as well as positive foreign currency effects.

In addition to the aforementioned effect, profit before income taxes, profit for the year, and profit for the year attributable to owners of the parent were affected by gains or losses on foreign exchange included in finance income and finance costs.

\* Basic earnings per share attributable to owners of the parent is calculated based on profit for the year attributable to owners of the parent.
