

Honda Fuel Cell Systems

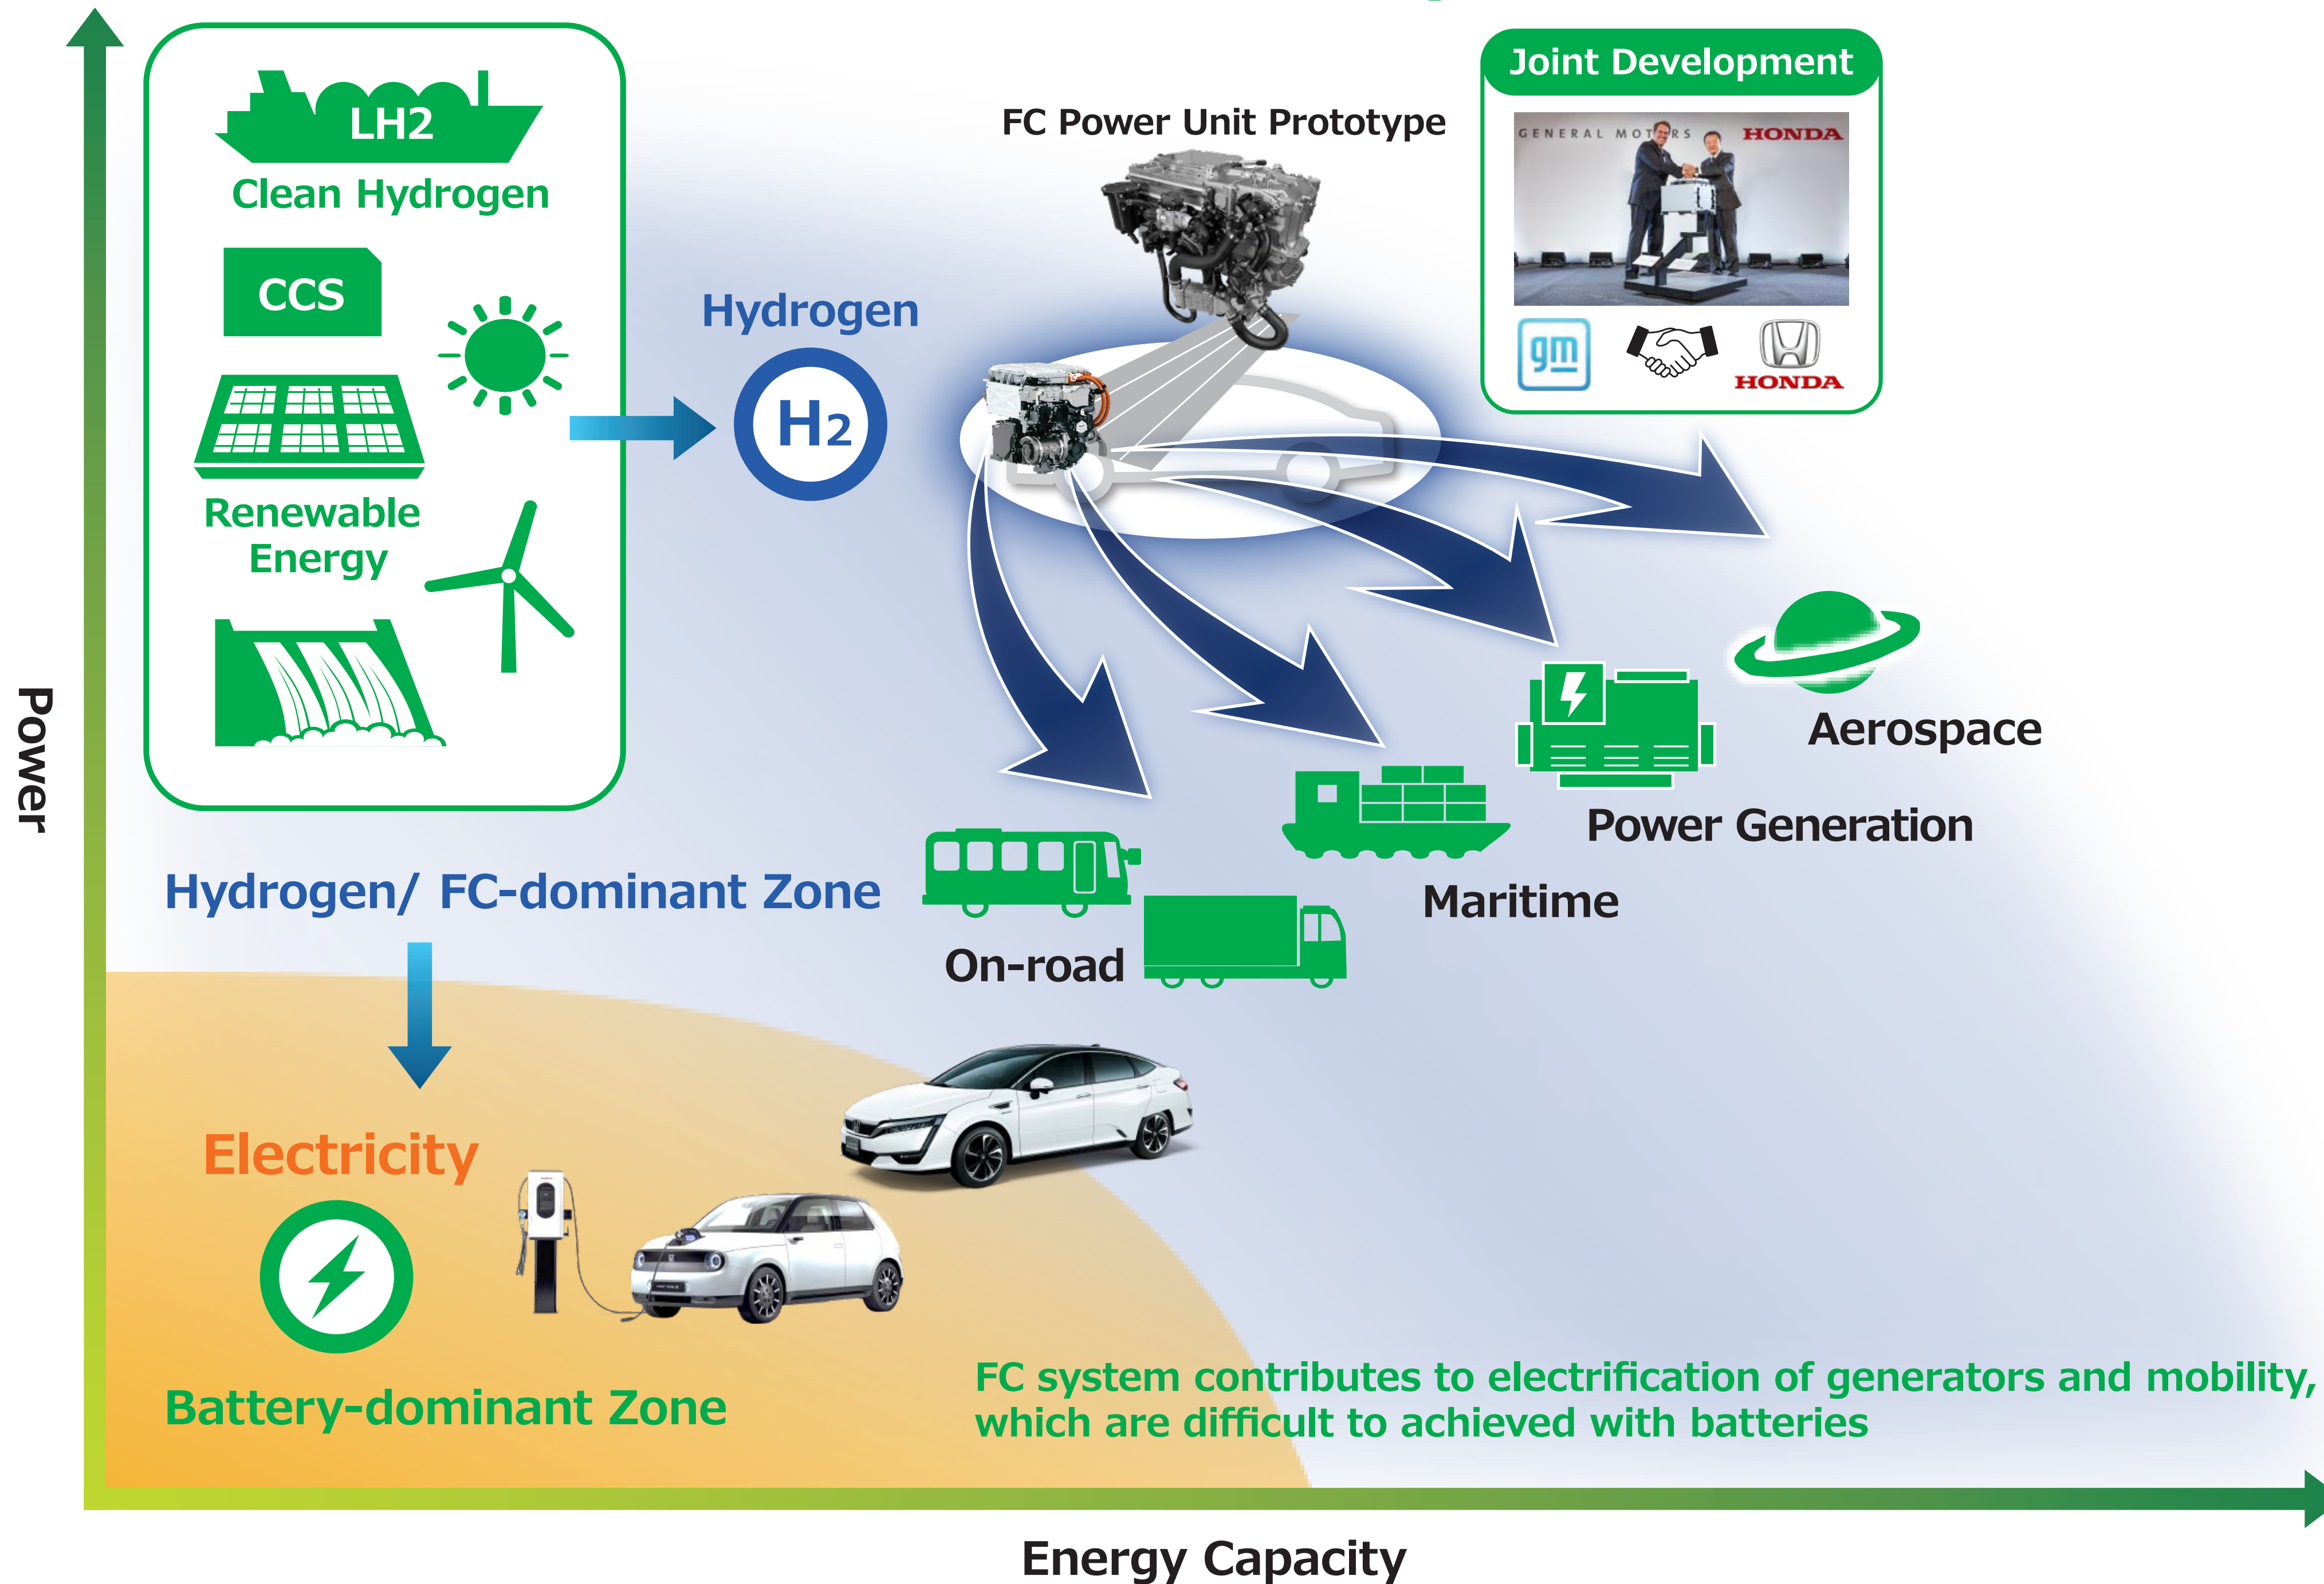

Objective

Make hydrogen economy a reality by utilizing FC core technology that can provide clean mobility and safe energy.

Technical Features

- Flexible power output by connecting multiple FC systems
- Available for various mobility/energy applications
- Achieved inexpensive and long-life FC systems through joint development with GM

Honda Fuel Cell Systems

Investigate versatile deployment of the FC systems

Commercial Truck

Fuel Cell Backup

Maritime

Portable Power Supply

Aerospace

Exploration of potential of the FC system
