

# Honda Driver Coaching Service with Driving Diagnostics and Verbal Advice

Provide real-time driving diagnostics and verbal advice using vehicle data, as well as detailed education content according to diagnostic results.

## Technology Details

- Vehicle communication data is acquired through smartphones to diagnose driving behavior in each driving scenario in detail using experienced driver models.
- Not only does it display content based on diagnostic results, but it also provides timely advice based on driving operation while driving, supporting the same safe driving technique acquisition and safety recognition improvement as those of experienced drivers.

## Technology Characteristics

- Communication data and driving behavior models are used to diagnose driving in real time through a smartphone.
- Verbal advice is provided in a timely manner, supporting the acquisition of safe driving.
- Detailed educational content is displayed based on diagnostic results.

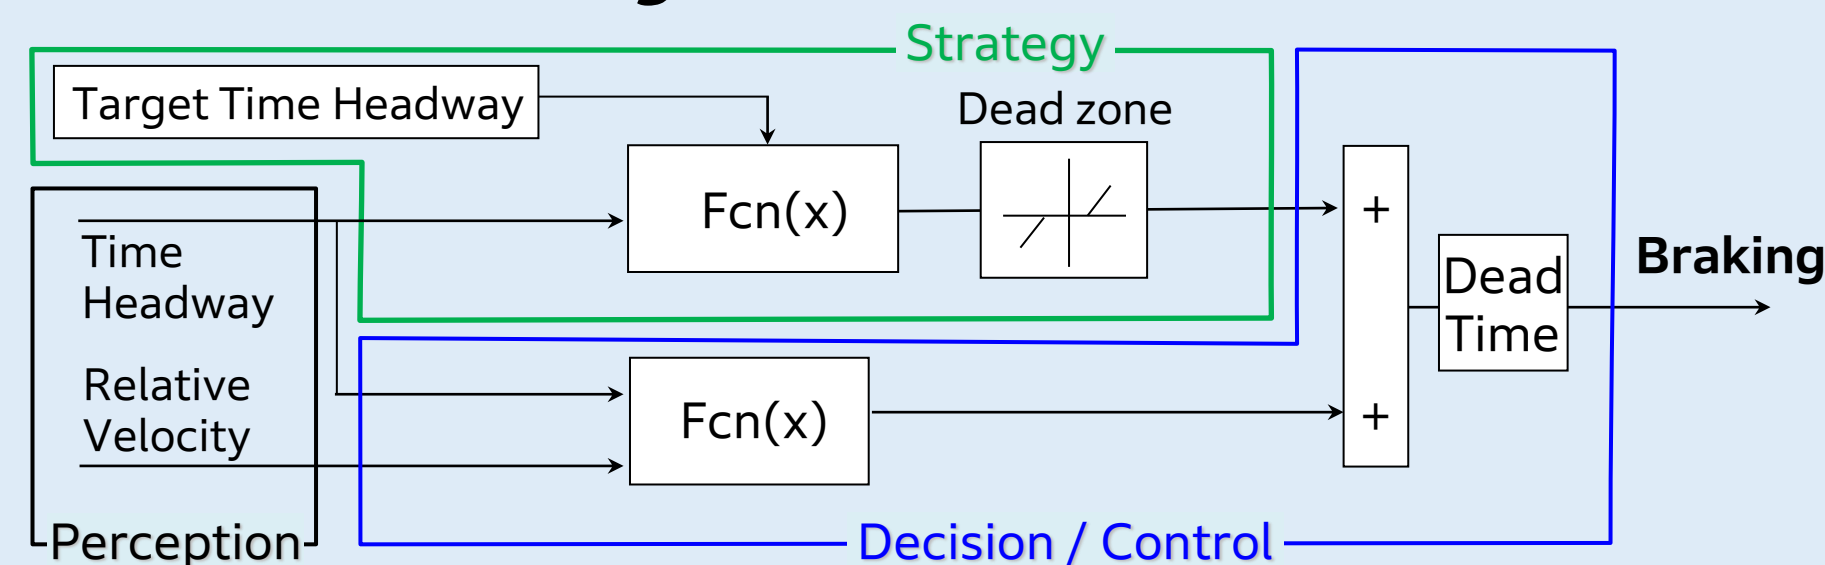

## Diagnostic Method

### Driver Model

Developed for each driving scene

*In case of following*

## System Configuration

## Applicable Vehicle Models

- Accord (2018–2020 and 2023 or newer)
- Civic (2019–2020 and 2025 or newer)
- Civic Type R (2021 or newer)
- CR-V (2020 or newer)
- HR-V (2023 or newer)
- Pilot (2023 or newer)
- Integra (2023 or newer)
- Ridgeline (2024 or newer)
- MDX (2024 or newer)
- Odyssey (2025 or newer)
- Passport (2026 or newer)

Supports the acquisition of driving technique/safety recognition for younger people at a higher risk for accidents.
