Assurance (Environment/Social)

To disclose environment and social-related data to our diverse stakeholders in a more transparent and reliable manner, Honda obtained the independent practitioner's assurance of the environment- and social-related data indicated with for the year ended March 31, 2024 in the Japanese version of this report by Deloitte Tohmatsu Sustainability Co., Ltd., a subsidiary of Deloitte Touche Tohmatsu LLC, which is a member firm of Deloitte Touche Tohmatsu Limited.

Scope of Assurance

Environment-related data assured:

- Direct emissions from business activities (Scope 1), Indirect emissions from energy use (Scope 2), Emissions from Honda business activities (Total of Scope 1 and 2) and Emissions from customer use of sold products (Scope 3, category 11) out of Honda's total GHG emissions
- GHG emissions (Direct emissions (Scope 1), Indirect emissions (Scope 2), Total emissions (Scopes 1 and 2))
- Energy consumption (Direct energy consumption, Indirect energy consumption and Total energy consumption)
- Water intake/Wastewater volume
- Atmospheric pollutants (SOx emissions, NOx emissions)
- Waste generated

Social-related data assured:

- Lost time injury frequency rate (LTIFR) in Japan
- The number of work accident fatality in Japan

Deloitte.

Independent Practitioner's Assurance Report

June 21, 2024

Mr. Toshihiro Mibe,
Director, President and Representative Executive Officer,
Chief Executive Officer
Honda Motor Co., Ltd.

Tomoharu Hase
Representative Director
Deloitte Tohmatsu Sustainability Co., Ltd.
3-2-3, Marunouchi, Chiyoda-ku, Tokyo

We have undertaken a limited assurance engagement of the environment- and social-related data indicated with for the year ended March 31, 2024 (the "Sustainability Information") included in the "Honda ESG Data Book 2024" (the "Report") of Honda Motor Co., Ltd. (the "Company").

The Company's Responsibility

The Company is responsible for the preparation of the Sustainability Information in accordance with the calculation and reporting standard adopted by the Company (indicated with the Sustainability Information in the Report). Greenhouse gas quantification is subject to inherent uncertainty for reasons such as incomplete scientific knowledge used to determine emissions factors and numerical data needed to combine emissions of different gases.

Our Independence and Quality Management

We have complied with the independence and other ethical requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behavior. We apply International Standard on Quality Management 1, *Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements*, and accordingly maintain a comprehensive system of quality management including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Our Responsibility

Our responsibility is to express a limited assurance conclusion on the Sustainability Information based on the procedures we have performed and the evidence we have obtained. We conducted our limited assurance engagement in accordance with the International Standard on Assurance Engagements ("ISAE") 3000, *Assurance Engagements Other than Audits or Reviews of Historical Financial Information*, issued by the International Auditing and Assurance Standards Board ("IAASB"), ISAE 3410, *Assurance Engagements on Greenhouse Gas Statements*, issued by the IAASB and the *Practical Guideline for the Assurance of Sustainability Information*, issued by the Japanese Association of Assurance Organizations for Sustainability Information.

The procedures we performed were based on our professional judgment and included inquiries, observation of processes performed, inspection of documents, analytical procedures, evaluating the appropriateness of quantification methods and reporting policies, and agreeing or reconciling with underlying records. These procedures also included the following:

- Evaluating whether the Company's methods for estimates are appropriate and had been consistently applied. However, our procedures did not include testing the data on which the estimates are based or reperforming the estimates.
- Undertaking site visits to assess the completeness of the data, data collection methods, source data and relevant assumptions applicable to the sites.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had we performed a reasonable assurance engagement.

Limited Assurance Conclusion

Based on the procedures we have performed and the evidence we have obtained, nothing has come to our attention that causes us to believe that the Sustainability Information is not prepared, in all material respects, in accordance with the calculation and reporting standard adopted by the Company.

The above represents a translation, for convenience only, of the original Independent Practitioner's Assurance report issued in the Japanese language.
